Quick Guide for Publishers of PDF files

Security options available using Drumlin and Javelin from Drumlin Security Ltd: file copy protection; text copy and screen capture protection; single or multiple machines permitted (DRM protection service); print enabling/disabling with optional pages limit; intelligent watermarking (on-screen and/or on-print); date protection (number of days or specified dates); viewing limits (number of viewings permitted); permitted user lists and user management controls (registered Drumlin users only, not Javelin reader). All software products are free, but DRM and development/support services involve some fees (see [website](#)).

Type of PDF document(s) to be published	Audience	Number of files to publish	Suggested options
Books or technical manuals, mono or color with internal and/or external hyperlinks and/or navigation tree	Consumers/ general public	1-10	<p>Drumlin/Javelin: Use Drumlin (under MS Windows) to create secured PDFs (as .drm or .exe files) or ask Drumlin Security Ltd to create the files for you. For Mac OSX users and cross-platform usage keep to drmx files. Provide exe files and/or Javelin reader plus drmx files to end users to authorize/read files. Optionally ask Drumlin Security Ltd to prepare the files for you. Order authorization codes and any other services required from Drumlin web site, store page. For hand-held target devices (e.g. Nook, Kindle, iPAD) create ePUB files/MOBI files (not PDFs) and submit to the relevant service providers (B&N, Amazon, Apple). Ask us about delivery to iPAD, which is in development at present</p> <p>Branding: optionally have your own Branded version of the Javelin reader (requires order for this option - samples available for prior testing) - Windows version branding is available as standard at present, but limited branding of the Mac version is available, or a special version can be built (full “white label” option)</p> <p>E-commerce: if required, use an existing digital products e-commerce/fulfilment service (e.g. PayLoadz), or implement own facility, or ask Drumlin Security Ltd to provide hosted e-commerce service (see our PDF Publishing website for details). For larger volumes use automated delivery of authorization codes (e.g. using LinkLok or</p>

Type of PDF document(s) to be published	Audience	Number of files to publish	Suggested options
			own code)
		10-100s	As above, plus ask for Batch mode processing option to be enabled (requires order for this option) - automates secure file creation for large volumes of files/regular file updates
	Corporate customers, internal	1-100s	<p>1. Drumlin/Javelin: Use Drumlin (under MS Windows) to create secured PDFs (as .drm files with userlists set or as .drmx files). If all users are known in advance (e.g. field engineers, sales personnel) pre-install Drumlin and note the registration details (userIDs). Create a list of permitted users and select the Userlist facility in Drumlin to create files that do not require authorization but can only be read by the selected list of users - can be combined with batch publishing for large numbers of files (e.g. technical manuals)</p> <p>2. Hosted web service using web-based flash viewer - document access to web service controlled via username/password or in-house user access management systems (internal or external). File conversion to suitable format and page encryption by Drumlin Security Ltd. Hosting on our PDF-Publishing.com website or on the 'training' website</p>
Corporate customers, external	1-100s	<p>1. Drumlin/Javelin: Use Drumlin (under MS Windows) to create secured PDFs (as .drmx files) or ask Drumlin Security Ltd to create the files for you. Deliver secured files as Javelin reader plus .drmx files. If customers cannot accept third party readers and security controls, use a pure Adobe Reader-based solution or hosted web service solution (below)</p> <p>2. Hosted web service using web-based flash viewer - document access controlled via username/password to web service (internal or external). File conversion to suitable format and page encryption by Drumlin Security Ltd. Hosting on our PDF-Publishing.com website or on the document publisher's website</p> <p>Branding: optionally have your own Branded version of the Javelin reader (requires order for this option - samples available for prior testing) - Windows version branding is available as standard at present, but limited branding of the Mac version</p>	

Type of PDF document(s) to be published	Audience	Number of files to publish	Suggested options
			is available, or a special version can be built (full “white label” option)
Training materials and/or sales presentation materials etc. (as PDF files)	Service subscribers/ students (private or corporate)	1-100s	<p>1. Drumlin/Javelin: As above using Javelin as end user reader. Optionally a single authorization code can be provided to a subscriber/student that may be used on any of a pre-defined set of training material PDFs. Note that Full screen mode is available on Javelin for presentation purposes (digital projectors with remote control device).</p> <p>Branding: optionally have your own Branded version of the Javelin reader (requires order for this option - samples available for prior testing) - Windows version branding is available as standard at present, but limited branding of the Mac version is available, or a special version can be built (full “white label” option)</p> <p>2. Hosted web service using web-based flash viewer - document access controlled via username/password to web service (internal or external). File conversion to suitable format and page encryption by Drumlin Security Ltd. Hosting on our PDF-Publishing.com website or on the ‘training’ website</p>

Additional notes:

- International usage - Javelin and Drumlin reader (for Windows) can be set to display menus and text messages etc. in many of the major languages of the world, including (for Javelin) English, Spanish, French, German, Chinese (both variants), Arabic and others.
- Sample Javelin files can be downloaded from: <http://www.drumlinsecurity.com/samples.html>
- Sample/demo files that include some security (but not copy protected) can be created as EXE files that do not require authorization
- Sector-specific solution pages can be found at: <http://www.drumlinsecurity.com/solutions.html>
- On-line documentation on Drumlin and Javelin can be found at: <http://www.drumlinsecurity.com/webhelp/>
- Publishing guidance is also provided on the page: <http://www.drumlinsecurity.com/publisher.html>
- No special software is required on your own website for Drumlin DRM services - this is provided by Drumlin Security Ltd as an in-network service
- Terms and conditions of usage apply - see [About](#) page for more details
